(57) Abstract :

The prevent invention is related to parking system and space management. The number of vehicles has expanded, while the parking space has remained constant. This has resulted in parking issues. The idea is to bring a vacant area which can be utilized for parking under one umbrella. In the invention, this way parking space would never be saturated, which regulated tariffs based on size of vehicle and duration would be taken care of. The system would ensure the safety of both vehicles and area-owner would be provided. The problem of cruising would be solved using this invention. Figures of the invention show the details of the work.
